Maintenance of Certification Program

NOTE: All policies, components, and requirements of the ABPN Maintenance of Certification (MOC) Program are subject to change. Each ABPN Diplomate is responsible for remaining informed about the current MOC program requirements. Diplomates are encouraged to consult the ABPN website at www.abpn.com for regular updates.

The American Board of Psychiatry and Neurology (ABPN) Maintenance of Certification (MOC) Program

Introduction

The Maintenance of Certification Program (MOC) of the American Board of Psychiatry and Neurology reflects the Board's commitment to lifelong learning throughout one's profession. The purpose of MOC is to ensure that diplomates adhere to the highest standards in medicine and pursue excellence in all areas of care and practice improvement.

The MOC program requires diplomates to participate in sanctioned self-assessment performance measures, identify possible weaknesses in their knowledge, pursue learning activities tailored to individual areas that need to be strengthened, and develop quality improvement programs based on their clinical practice. The goal for diplomates is to reflect on their personal knowledge and performance, commit to a process of improvement and reevaluation over specified time frames, and continually improve care for their patients.

The ABPN has developed a program for our diplomates that strikes a balance between what will likely be required by organizations that license, credential, and pay physicians, and what is reasonable and straightforward enough to be accomplished by busy physicians. Many of our diplomates are already participating in various components of MOC through institutional quality improvement programs. The MOC program endeavors to recognize those efforts. ABPN has worked to develop a clear MOC program that will enable diplomates to demonstrate their competence throughout a certificate cycle.

The ABPN is committed to supporting its diplomates throughout their careers by advancing the clinical practices of psychiatry and neurology and by promoting the highest evidence-based guidelines and standards.

History of Recertification and Maintenance of Certification

Before October 1, 1994, physicians certified in psychiatry, child and adolescent psychiatry, neurology, or neurology with special qualification in child neurology were granted lifetime certificates.

Between October 1, 1994 and December 31, 2011 all individuals achieving specialty Board certification by the ABPN were issued time-limited certificates that expired December 31, ten years after they were issued. Certificates issued in all subspecialties except child and adolescent psychiatry have always been time-limited. Time-limited certificates for child and adolescent psychiatry began in 1995. Beginning January 1, 2012, all certifications are dependent upon continuous maintenance of certification based on a three-year cycle of requirements with certificates being valid as long as they are maintained. The examination cycle remains at ten years.

Due to a mandate of the American Board of Medical Specialties (ABMS), the recertification program transitioned to MOC in 2007. Before 2007, diplomates recertified by taking the recertification examination. Beginning in 2007, admission to the recertification examination (now called MOC) required prerequisites. The change from recertification to MOC strengthened the program and guaranteed that physicians were current in ways not immediately available for testing.
Diplomates’ certification and maintenance of certification statuses are public information. This information is reported by the ABPN to the public in the ABPN verifyCERT® system and annually to the ABMS.

Time-limited specialty certificates (psychiatry, neurology, and neurology with special qualification in child neurology) and all subspecialty certificates must be renewed periodically in order to remain valid. Certificates that are not renewed are no longer valid and the physician is no longer certified in that specialty and/or subspecialty.

General Conditions of Maintenance of Certification

Time-limited specialty certificates (psychiatry, neurology, and neurology with special qualification in child neurology) and all subspecialty certificates must be renewed periodically in order to remain valid. Certificates that are not renewed are no longer valid and the physician is no longer certified in that specialty and/or subspecialty.

Certifications in the subspecialties (with the exception of child and adolescent psychiatry) are dependent upon the primary specialty. Diplomates must maintain certification in their specialty in order to maintain certification in the area of subspecialization. **If certification in the primary specialty lapses, certification in any subspecialty except child and adolescent psychiatry is no longer valid.**

Diplomates in child and adolescent psychiatry do not need to maintain certification in general psychiatry for their subspecialty certification in child and adolescent psychiatry to remain valid.

If a certificate lapses, there is no time limit on regaining certification status through MOC.

Maintenance of Certification program participation includes meeting all MOC requirements, [Professional Standing, Continuing Medical Education (CME) credits, Self-Assessment (SA) credits, Patient Safety Activity (if required) and an Improvement in Medical Practice (PIP) Unit] as well as passing the MOC examination every 10 years or participating in the MOC Part III Pilot Project. **Maintenance of Certification requirements must be completed prior to applying for the examination.**

Any CME, SA, and/or PIP activities completed will apply to all specialties and/or subspecialties in which a physician is certified. Combined MOC examination formats are available for physicians who wish to maintain certification in more than one area at the same time.

The expertise component of the MOC program is the MOC examination or participation in the MOC Part III Pilot Project. A passing score on the MOC examination automatically enrolls the diplomate into the Continuous Maintenance of Certification (C-MOC) Program. Once enrolled in C-MOC, diplomates will need to satisfy the MOC activity requirements and pay the annual fee.
Diplomate Audits

The ABPN will randomly audit approximately five percent of diplomates in the MOC Programs each year. Diplomates who are audited will receive an email detailing the documentation required as evidence of completion of required MOC activities (CME, Self-Assessment, Patient Safety and PIP activities).

Diplomates with expired or invalidated ABPN certificates will be audited upon re-entry into the ABPN certification process.

Diplomates will be notified of the audit following completion of a three-year C-MOC block.

Diplomates who fail the C-MOC program audit will have their certification status changed to “Certified – Not Meeting MOC Requirements”. Diplomates will have the remaining time in their next block to provide their ABPN credentials auditor with the documentation to satisfy the requirements of the audit. If the requirements of the audit are met within this timeframe, the audit will be changed to a PASS status and the certification status will be updated to “Certified-Meeting MOC Requirements”. If the requirements of the audit have not been met by the end of the next block (6 years), a diplomate will be reported as “Not Certified”.

See the ABPN Audit Guidelines for Diplomates document on our website for more information.

The Two Maintenance of Certification Programs

The ABPN currently has two active MOC programs and specific activity requirements exist for each:

- The 10-Year MOC Program is for diplomates with time-limited certificates issued prior to 2012. These diplomates will be recertifying between 2019-2021. MOC activities must be completed before applying for the MOC examination.
- The C-MOC Program or Continuous Maintenance of Certification is for diplomates who pass an exam (initial certification or MOC) in 2012 or later. As of 2012, diplomates are automatically enrolled in the Continuous MOC Program (C-MOC) upon passing an examination.

MOC Requirements can be found on pages 5 through 9. A list of the requirements unique to each program can be found in the MOC Roadmap on page 12, with additional details about the 10-Year MOC program on page 13 and the C-MOC program on page 14.
Maintenance of Certification for Lifetime Certificate Holders

Physicians certified in psychiatry, child and adolescent psychiatry, neurology, or neurology with special qualification in child neurology before October 1, 1994 were granted lifetime certificates.

Participation in the MOC program is not required for diplomates with lifetime certificates; however, credentialing requirements for hospitals, practice groups, and third-party payers may require evidence of continuous certification efforts. In addition, some states are considering the implementation of Maintenance of Licensure Programs, similar to the MOC program.

There are two pathways for Lifetime Certificate holders to voluntarily participate in the MOC program:

1. Diplomates can apply for and take a MOC examination and be automatically enrolled in C-MOC upon passing the MOC Examination. Lifetime certificate holders do not need to complete MOC requirements prior to sitting for an MOC examination or

2. Diplomates can elect to enroll in C-MOC, complete one block of MOC activity requirements [90 Category 1 CME, of which 24 need to come from Self-Assessment CME, one Patient Safety Activity and one Improvement in Medical Practice (PIP) Unit], and then pass the MOC exam within three years. These diplomates will be listed as “Meeting MOC Requirements” from the date they enroll in C-MOC.

To elect into C-MOC, diplomates need to follow the prompts to “Switch to the C-MOC program” in his/her ABPN Physician Folios account’s Maintenance of Certification section, under the MOC Guide tab. The C-MOC enrollment fee of $175 will be credited towards the next MOC exam.

Lifetime certificate holders who voluntarily participate in the MOC program and do not pass the MOC examination will retain their lifetime certificate. Lifetime certificate holders who do not participate in MOC will be reported to the ABMS and on the ABPN website as, ‘Certified—not meeting MOC requirements and not required to do so’.
Maintenance of Certification Requirements

As mandated by the American Board of Medical Specialties (ABMS), the Board has developed an MOC program that include four components:

1. Professionalism and Professional Standing (Part I)
2. Lifelong Learning (CME), Self-Assessment (SA) and Patient Safety (Part II)
3. Assessment of Knowledge, Judgment, and Skills (Part III)
4. Improvement in Medical Practice (PIP) (Part IV)

Maintenance of Certification program participation includes meeting all four components of the MOC Program. Diplomates are only required to complete one set of MOC activity requirements (CME, SA and PIP activities) for all specialties/subspecialties in which a physician is certified.

1. Professionalism and Professional Standing
Professionalism forms the basis of medicine’s contract with society. The ABPN is concerned with those aspects of professionalism that are demonstrated through a physician’s clinical competence, commitment to lifelong learning and professional improvement, interpersonal skills, and ethical understanding and behavior. In its credentialing, certification, and MOC programs, the ABPN seeks to assess and document that its candidates and diplomates possess and maintain these aspects of professionalism.

To show evidence of professional standing, all diplomates must continuously hold an active, full, and unrestricted allopathic and/or osteopathic license to practice medicine in at least one state, commonwealth, territory, or possession of the United States or province of Canada. All licenses held by a physician must be unrestricted. An active, full, unrestricted license must be maintained even if the physician is out of the country for extended periods of time.

Full details of licensure requirements can be found in the General Information and Board Policies Manual on the ABPN website. Licenses must be kept up-to-date in an ABPN Physician Folios account.

2. Lifelong Learning (CME) and Self-Assessment (SA)

A. Continuing Medical Education (CME)
   - Diplomates in the 10-Year MOC program must complete 300 CME credits prior to applying for recertification.
   - Diplomates in the C-MOC program are required to complete an average of 30 specialty and/or subspecialty CME credits per year, averaged over three years.
   - CME can be ANY Category 1 credits relevant to one’s field of practice.
   - Diplomates choose their own CME activities. CME activities do not need to be ABPN approved.
   - Self-Assessment (SA) CME credits contribute to the overall number of CME credits.
   - CME activities completed for one specialty/subspecialty will satisfy the requirement for another specialty/subspecialty.

Acceptable CME credits are Category 1 CME accredited by the Accreditation Council for Continuing Medical Education (ACCME), Category 1A CME accredited by the American Osteopathic Association (AOA), or Category 1 CME accredited by the Royal College of Physicians and Surgeons of Canada.

B. Self-Assessment (SA)
Diplomates of the ABPN are required to participate in ABPN-approved Self-Assessment activities relevant to either their specialty and/or subspecialty. Self-Assessment activities are a specific type of CME activity that assist physicians in recognizing their current knowledge base in order to identify specific topics for gaining further knowledge.

   - Diplomates in the 10-Year MOC program must complete at least 24 Self-Assessment CME credits prior to applying for recertification.
   - Diplomates in the C-MOC program must complete at least eight SA CME per year, averaged over three years.
   - Self-Assessment activities must be selected from the ABPN Approved Products List since not all Category 1 CME activities meet specific Self-Assessment activity requirements.
   - Choose from the following to complete Self-Assessment activities:
     - Select activities from the ABPN Approved Products List. Some no-cost or reduced cost ABPN-approved activities on the list are available to members through their professional society.
Gain credit for up to two different types of Non-CME Self-Assessment Activity Options.
Complete Self-Assessment (Part II) activities under the auspices of an International Certification Organization (e.g. RCPS-C) that meets the ABPN MOC requirements; submit for preapproval.

**Non-CME Self-Assessment**
- The ABPN will waive eight SA CME credits through completion of specific non-CME SA activities.
- The ABPN will waive a maximum of 16 SA CME credits for two different non-CME SA activities or for successful completion of the MOC Part III Pilot Project.
- Diplomates in C-MOC must complete the approved non-CME SA activity during the current 3-year block for which they are earning non-CME Self-Assessment credit.
- Diplomates in the 10-Year MOC Program, who are due to recertify in 2019-2021, must complete the non-CME SA activities within the 3 years prior to applying for the MOC examination.

**Applicable Non-CME Self-Assessment Activities**
Eight Self-Assessment CME credits will be waived for EACH of the following options:

These options require no preapproval by the ABPN:
- Passing an ABPN certification or MOC exam within the current MOC block;
- Peer-reviewed journal article that has the status of ‘Indexed for MEDLINE’ on the MEDLINE database. See psychiatry and neurology article examples;
- Participate in an approved registry such as the Axon Registry from the American Academy of Neurology or the PsychPRO Registry from the American Psychiatric Association.

These options must be submitted to the ABPN at questions@abpn.com for preapproval:
- Approved scientific grant application (funding not required), with documented peer review/feedback, formal approval letter and/or priority score statement (i.e. Summary Statement with priority score from NIH, etc.), and significant/major contribution to the grant writing. Fellowship Awards do not qualify for scientific grant credit;
- Four hours of supervision from a supervisor or peer with written feedback about the diplomate’s clinical performance, medical knowledge and patient care;
  - Supervision activity similar to faculty to resident peer supervision
  - Involves diplomates presenting clinical cases to peer(s) and receiving detailed feedback on the care provided to specific patients
  - Must be documented and signed by the supervisor
- Formal institutional peer review committee with written feedback about the diplomate’s clinical performance, medical knowledge and patient care;
  - Reviews the clinical care a diplomate provides patients and gives written feedback
  - Keyed to review a specific medical condition or patient type
  - Typically, a chart review/QI process of diplomate clinical performance by a formal review committee at an institution.

*Note: Item writing and teaching/supervision do not count as approved non-CME SA activities.*

**Diplomates are required to use only ABPN-approved Self-Assessment Activities.**
The ABPN will approve additional activities over time and reserves the right to approve or reject any course or guideline submitted for approval.

**C. Patient Safety Activity**
The ABPN patient safety activity requirement began for diplomates who first passed a certification or MOC exam in 2016 and who entered the ABPN C-MOC Program in 2017. Those diplomates whose first block of MOC activities began in 2017 or later are now required to do or have done a patient safety activity within three years prior or three years after entering the C-MOC Program. Diplomates of the ABPN are required to participate in an ABPN-approved patient safety activity to ensure they have adequate knowledge of safety science and principles.

For example:
- A diplomate who is recertifying in 2019 can complete the patient safety activity within the three years prior to recertifying (2016-2018) OR during their first C-MOC block (2020-2022).
• A candidate who is taking their initial certification exam in 2018 can complete the patient safety activity within the three years prior to certifying (2016-2018) OR during their first C-MOC block (2020-2022).

Choose from ONE of the following options to complete the patient safety activity:

• A patient safety activity required by an accredited institution (e.g., hospitals, clinics, training programs) or
• A patient safety activity listed on the ABPN Approved Products List. Some no-cost or reduced cost ABPN-approved activities on the list are available to members through professional organization or
• A patient safety activity required for state medical licensure

General Information

• The patient safety activity is a one-time requirement.
• Diplomates will need to attest to a patient safety activity in their ABPN Physician Folios account.
• Institutions are NOT required to get preapproval from ABPN for patient safety activities.
• The candidate/diplomate must provide documentation of successful completion of the patient safety activity if audited.
• See your individual ABPN Physician Folios account for more information.

3. Assessment of Knowledge, Judgment, and Skills

To satisfy the Assessment of Knowledge, Judgment, and Skills component, diplomates must recertify for each certification they hold, in addition to satisfying the MOC activity requirements. Diplomates must either pass the computer-based MOC (recertification) examination once every ten years OR, beginning in 2019, opt to participate in the MOC Part III Pilot Project.

The ten-year MOC examination is a practice relevant, clinically oriented, multiple-choice, computer-administered examination. Review the ABPN Maintenance of Certification Exam Process Flyer for an overview of the MOC examination process.

Beginning in 2019, diplomates may opt to enroll in the MOC Part III Pilot Project for primary certifications that expire in 2019-2024, provided they are meeting MOC requirements, in lieu of sitting for the MOC examination. The Pilot Project is a professional journal article-based assessment activity designed as an optional alternative to the proctored 10-year MOC examination. Diplomates will read at least 30 selected articles and answer questions online. Diplomates who get 4 out 5 questions correct on at least 30 out of 40 articles will satisfy the Part III requirement and will not be required to take the computer-based MOC examination. See additional MOC Part III Pilot Project information on our website.

Primary specialty MOC examinations (psychiatry, neurology and child neurology) are offered twice a year. Subspecialty MOC examinations are offered once a year except for Child and Adolescent Psychiatry, which is offered twice a year. American Board of Psychiatry and Neurology (ABPN) diplomates certified in any subspecialty, apart from Child and Adolescent Psychiatry, are required to maintain their primary specialty certification.

See the Exam Schedule on our website for examination dates, application deadlines and dates when applications become available. Applications for MOC exams are only available on-line through ABPN Physician Folios. Diplomates are responsible for applying for MOC exams at the appropriate time.

Combined MOC examinations are available for physicians who wish to recertify in more than one specialty and/or subspecialty at the same time. Combined MOC examinations allow the diplomate to select either two or three specialty or subspecialty areas in which they are certified and take one MOC combined examination instead of two or three separate MOC examinations. Combined examinations consist of 100 questions from each specialty or subspecialty area.

Successful completion of the MOC Combined Exam is required of candidates seeking Maintenance of Certification in all of the specialties and/or subspecialties selected. To successfully complete this exam, a candidate must achieve an overall passing score on the entire examination. MOC modules are not passed or failed individually.

Only MOC examinations administered by ABPN are available in the combined examination format. The following MOC recertification examinations administered by other Boards are NOT available in the combined format: Brain Injury Medicine, Hospice and Palliative Medicine, Pain Medicine and Sleep Medicine.

On the ABPN website, view the General Information and Board Policies Manual or the ‘Information for Applicants’ (IFA) publication for each examination for additional information.
MOC examinations are administered at over 200 Pearson VUE Professional Centers throughout the United States and Canada, as well as at many international locations. Diplomates who select the international testing option when applying for an examination will be contacted by the ABPN concerning locations and cost.

Learn what to expect when you arrive at the Pearson VUE test center with a short video on the Pearson website.

View the Computer Based Testing at Pearson VUE FAQs for more information. ABPN examination sample screens can be found on the ABPN website.

4. Improvement in Medical Practice (PIP)

Diplomates choose ONE Clinical Module OR Feedback Module to complete the PIP Unit.

This quality improvement exercise is designed for clinically active physicians to identify and implement areas for improvement based on the review of one’s own patient charts (Clinical Module) OR feedback from peers or patients via a questionnaire/survey (Feedback Module).

Each Module consists of three steps to complete within a 24-month period:
Step A: Initial Assessment
Step B: Identify and Implement Improvement
Step C: Reassessment

General Information
- Diplomates who are clinically active and/or engaged in consultative care will need to complete the PIP Unit. See the Clinical Activity Status page for more information.
- Please allow ample time to complete the PIP Unit (Steps A, B and C).
- Use the same feedback option for the initial assessment and reassessment steps.
- For the 10-year MOC program, one PIP Unit is required and for the C-MOC Program, one PIP Unit is required every 3 years.
- ABPN does not collect patient or peer data. If audited, ABPN will require that diplomates explain how they carried out the Improvement in Medical Practice Unit and submit information about their process and improvement plan. The ABPN Audit Guidelines for Diplomates document lists the documentation needed in the event of an audit.
- Preapproval is not needed if the questionnaire/survey addresses the six general competencies: patient care, medical knowledge, interpersonal and communication skills, practice-based learning, professionalism, and systems-based practice.

Note: Only those diplomates in the 2013-2015 C-MOC block must complete BOTH a Clinical Module and a Feedback Module for that specific C-MOC block.

A. Clinical Chart Review Module
Diplomates demonstrate their involvement in quality improvement by choosing one of the following options:

- Select a Clinical Module from the ABPN Approved Products List
- Participate in your institution’s QI effort that is approved by the ABMS Portfolio Program
- Participate in an approved registry such as the Axon Registry from the American Academy of Neurology or the PsychPRO Registry from the American Psychiatric Association
- Participate in a Joint Commission Certified Primary or Comprehensive Stroke Center
- Participate in a Joint Commission accredited, specialty-specific Ongoing Professional Practice Evaluation (OPPE). Individual preapproval is no longer required. See the website for examples.
- Complete a quality improvement effort under the auspices of an International Certification Organization (e.g. RCPS-C) that meets the ABPN MOC requirements; submit for preapproval or
- Seek individual preapproval (at no charge) for your own developed Clinical Module, or your institution’s quality improvement efforts. Submit for preapproval using the Individual Part IV Improvement in Medical Practice (PIP) Approval Request Form.

How to complete the Clinical Module
Step A: Initial assessment of five patient charts
- Collect data from at least five of your own patient charts in a specific category (diagnosis, type of treatment, or treatment
setting) obtained from your practice over the previous three-year period.

- Compare the data from the five patient cases with published best practices, practice guidelines, or peer-based standards of care (e.g., hospital QI programs, standard practice guidelines published by specialty societies), using a minimum of four quality measures.

**Step B: Identify and Implement Improvement**

- Based on results from chart reviews, develop and carry out a plan to improve effectiveness and/or efficiency of your medical practice.
- If no areas for improvement are determined based on initial assessment, then maintenance of performance in medical practice should be reassessed in Step C.

**Step C: Reassessment of five patient charts**

- Within 24 months of initial assessment, collect data from another five of your own patient charts (may use same or different patients).
- Use the same category and practice guidelines for the initial assessment and reassessment steps.

**B. Patient or Peer Feedback Module**

For the Feedback Module, clinically active diplomates obtain feedback regarding their own clinical performance by completing one of the following options. The Feedback Module consists of three steps to complete within a 24-month period.

**How to Complete a Feedback Module**

**Step A: Initial assessment of patient or peer feedback**

Collect initial feedback from ONE of the following options:

- Patient* feedback forms from five patients
- Peer** feedback forms from five peers
- Resident evaluation feedback forms from five residents
- Supervisor evaluation feedback form from one supervisor or
- 360 Degree evaluation feedback forms from five respondents

Diplomates may choose a feedback module from the Approved Products List, or use an ABPN feedback form, or submit their institution’s patient survey or peer evaluation for individual preapproval. The feedback forms must address the six general competencies: patient care, medical knowledge, interpersonal and communication skills, practice-based learning and improvement, professionalism, and systems-based practice.

**Step B: Identify and implement improvement**

- Based on results from feedback, identify opportunities for improvement to the effectiveness and/or efficiency in practice as related to the general competencies and take steps to implement improvements as needed.
- If no areas for improvement are determined based on initial assessment, then maintenance of performance in medical practice should be reassessed in Step C.

**Step C: Reassessment of patient or peer feedback**

- Within 24 months of initial assessment, collect data from another set of the same or different patients or peers.
- Use the same feedback option for the initial assessment and reassessment steps.

Model feedback forms are available on the ABPN Approved Products List at no cost.

* Patients may include those for which the diplomate supervises the care of another provider (e.g., resident).

** Peers may include other professional healthcare staff such as counselors, nurses, physicians, psychologists, and social workers.
Clinical Activity Status

The ABMS has issued definitions of ‘Clinically Active’ and ‘Clinically Inactive’ and requires that all diplomates self-report their status once every 24 months in each area of certification. This information will be available to the public.

1. **Clinically Active**: Any amount of direct and/or consultative patient care has been provided in the preceding 24 months. This includes the supervision of residents.
   A. Engaged in direct and/or consultative care **sufficient** to complete an Improvement in Medical Practice (PIP) Unit
   B. Engaged in direct and/or consultative care **not sufficient** to complete a PIP Unit

2. **Clinically Inactive**: No direct and/or consultative patient care has been provided in the past 24 months.

3. **Status Unknown**: No information available on the clinical activity of this diplomate.
   - Diplomates who are in Category 1A above are required to complete all components of the MOC program including a PIP Unit.
   - Diplomates who are in categories 1B or 2 above are required to complete all components of the MOC program except a PIP Unit.
   - A change in diplomate status from 1B or 2 to 1A requires the completion of at least one PIP Unit.

Diplomates must update their Clinical Activity Status in the Diplomate Information and Status section in ABPN Physician Folios on [www.abpn.com](http://www.abpn.com).

Alternative MOC Activity Options

1. **MOC Activity Waiver for Fellowships**
   A three-year block of C-MOC requirements (CME, SA, and PIP) will be waived for diplomates who graduated from an ACGME-accredited subspecialty fellowship training program, an ABPN-approved Triple Board, or an ABPN-approved Post Pediatrics Portal program in 2011 or later AND who pass the corresponding ABPN or an ABMS Member Board subspecialty certification exam. Diplomates will receive a three-year block MOC activity waiver for the current block they are in at the time of passing the subspecialty exam.

   Upon passing the subspecialty exam, diplomates will see the waiver reflected in their Physician Folios account. Diplomates who meet the criteria via another ABMS Member Board subspecialty will need to email the Board an individual request prior to the waiver being applied.

   Diplomates are required to pay the annual fee and attest to completion of an approved patient safety activity (if applicable).

   If a diplomate believes he/she is eligible for the credit, but did not receive notice of the credit waiver, he/she should contact the Board via [questions@abpn.com](mailto:questions@abpn.com).

2. **ABMS Multi-Specialty MOC Portfolio Program**
   The ABPN recognizes that many physicians already participate in quality improvement (QI) efforts in their local institutions. The American Board of Medical Specialties (ABMS) Multi-Specialty MOC Portfolio Approval Program (Portfolio Program), is an alternative pathway for healthcare organizations that support physician involvement in QI and MOC to have their QI efforts be approved for MOC Part IV credit.

   A list of Portfolio Program sponsors can be found on the ABMS Portfolio Program website. Physicians should contact the portfolio program manager at their institution for a list of approved projects.

   ABPN Diplomates who successfully complete an approved QI program receive credit for one PIP Clinical Module. If the approved QI effort includes a patient or peer survey, ABPN Diplomates may also receive credit for one PIP Feedback Module. Diplomates are only required to complete ONE Clinical Module OR Feedback Module activity to complete the PIP Unit.
3. ABMS Member Board Reciprocal MOC Credit
ABPN diplomates who are currently completing Self-Assessment (Part II) and/or Improvement in Medical Practice (PIP/Part IV) requirements of another ABMS Member Board will also be able to claim that Self-Assessment (Part II) and/or Improvement in Medical Practice (PIP) credit for the ABPN MOC Program.

In order to maintain ABPN certification, diplomates will need to:

- Satisfy all four components of MOC:
  - Maintain full, unrestricted medical licensure;
  - Complete CME, Self-Assessment, and Patient Safety activities;
  - Complete an Improvement in Medical Practice (PIP) Unit;
  - Pass the ABPN MOC exam every 10 years or successfully complete the MOC Part III Pilot Project.
- Complete the reciprocal MOC credit during the current ABPN MOC block.
- Provide documentation from the other board if audited.
- If enrolled in the C-MOC program, attest to the reciprocal credit in the ‘Activity Attestation’ section of ABPN Physician Folios and pay the annual fee.

*Please check the exam schedule and application deadlines on our website for the latest information.*

*All diplomats entering the ABPN C-MOC Program whose first block began in 2017 or later are required to do or have done a patient safety activity within three years prior or three years after entering the C-MOC Program.*

*Diplomates must pay the annual fee ($175 in 2019) in their Physician Folders account.*

*Beginning in 2019, eligible diplomats may participate in the MOC Part III Pilot Project. The project is a professional journal article-based assessment activity designed as an optional alternative to the current secure, proctored 10-year MOC examination. See our website for details.*
Specific Requirements: 10-Year MOC Program

Program for Diplomates certified before 2012

Diplomates who passed a certification or MOC exam prior to 2012 and are due for recertification in 2019-2021 are in the 10-Year MOC Program.

Diplomates in the 10-Year MOC Program who are not recertified before their certificates expire are no longer board certified in that area of certification.

All diplomates in the 10-Year MOC Program will be automatically enrolled in the Continuous MOC (C-MOC) Program upon passing the MOC exam. The 10-Year MOC Program will sunset in 2021.

General Requirements

- Maintain an active, full, unrestricted medical license.
- Complete the following MOC activities prior to applying for a MOC exam:
  - 300 Category 1 CME credits (includes SA CME)
  - 24 Self-Assessment (SA) CME credits
  - One Improvement in Medical Practice (PIP) Unit
- Pass a MOC exam for each certification every 10 years or participate in the MOC Part III Pilot Project.

10-Year MOC diplomates will pay for board certification and attest to completing MOC activities at the time they pay for the MOC exam. Diplomates who participate in the MOC Part III Pilot Project need to complete the MOC activities and pay by September 1 of the year their certificate expires. The activities can be in either one’s general specialty and/or subspecialty(ies). CME credits can be derived from any Category 1 CME credits relevant to one’s field of practice (they do not need to be ABPN-approved). Both the Self-Assessment (SA) and PIP activities must be ABPN-approved.

Physicians certified or recertified in 2012 or later should refer to the C-MOC section on page 14.

Diplomates Not Meeting 10-Year MOC Requirements

Diplomates' certification and maintenance of certification statuses are public information and are reported by the ABPN to the public in the ABPN verifyCERT® system and to the ABMS annually.

- Diplomates who do not meet the specific admission requirements for the MOC examination in the year in which they wish to recertify will not be admitted to the examination.
- Diplomates must pass a MOC exam every ten years and are allowed two consecutive attempts per application.
- If a diplomat does not pass the MOC exam on the first attempt in the tenth year, he or she may retake the examination during the next consecutive scheduled MOC exam administration without change in Board certification status. If the diplomat fails the MOC exam on the second attempt, his/her certification status will be reported as “Not Certified”.

Change of Status from ‘Not Certified’ to ‘Certified and Maintaining Certification’

Physicians with lapsed certificates who were initially certified in the 10-Year MOC program may regain certification by meeting the MOC activity requirements for the year in which they wish to recertify and by passing the MOC examination.
Specific Requirements:
Continuous Maintenance of Certification (C-MOC) Program

Program for Diplomates certified or recertified beginning in 2012

Beginning in 2012, diplomates who certify or recertify are enrolled in the Continuous Maintenance of Certification (C-MOC) Program.

Certificates issued in the C-MOC Program do not have an end date as continuous certification is contingent upon meeting all requirements of the C-MOC Program.

General Requirements

- Maintain an active, full, unrestricted medical license.
- Complete and attest to the following MOC activities for each 3-year block in the Physician Folios account ‘Activity Attestation’ section:
  - 90 Category 1 CME credits (includes SA CME)
  - 24 Self-Assessment (SA) CME credits
  - One Patient Safety Activity (See your Physician Folios account to learn if this one-time requirement applies to you)
  - One Improvement in Medical Practice (PIP) Unit*
- Pay the Annual Fee ($175 in 2019).
- Pass a MOC exam for each certification every 10 years or participate in the MOC Part III Pilot Project

*Note: Only those diplomates in the 2013-2015 C-MOC block must complete BOTH a Clinical Module and a Feedback Module for that specific C-MOC block.

The activities can be in either one’s general specialty and/or subspecialty(ies). CME credits can be derived from any Category 1 CME credits relevant to one’s field of practice (they do not need to be ABPN-approved). The Self-Assessment (SA), PIP, and Patient Safety activities must be ABPN-approved.

See page 10 for information on Alternative MOC Activity Options such as MOC Activity Waiver for Fellowships, Multi-Specialty MOC Portfolio Program and Reciprocal Maintenance of Certification credit.

Diplomates Not Meeting C-MOC Requirements

Diplomate certification and maintenance of certification statuses are public information and are reported by the ABPN to the public through the ABPN verifyCERT® system and to the ABMS annually.

Diplomates need to satisfy all MOC requirements per three-year block in order to maintain their certification status. A diplomate will be reported as “Certified- Not Meeting MOC Requirements” if he/she does not sign on to his/her ABPN Physician Folios account, pay the annual fee and attest to completed activity requirements by the end of a 3-year block. A diplomate may change his/her status to “Meeting MOC Requirements” by completing insufficient block activities, current block activities, and payment of all required fees. Fees and MOC activity requirements must be fully met by the end of every 3-year block.

A diplomate will be reported as “Not Certified” if he/she does not complete 6 years (2 blocks) of MOC requirements. A diplomate may change his/her status back to “Certified- Meeting MOC requirements” upon successful completion of a block of MOC requirements and passing a MOC examination.

Change of Status from ‘Not Certified’ to ‘Certified and Maintaining Certification’

Physicians with lapsed certificates who were initially certified in the C-MOC program may regain certification by meeting the MOC activity requirements for the year in which they wish to recertify and by passing the MOC examination.
Responsibilities of Diplomates

• Diplomates are responsible for understanding and following current requirements for MOC and submitting application materials for MOC examinations by the appropriate deadlines.
• Diplomates are responsible for keeping their medical license information up-to-date.
• Diplomates are responsible for keeping their mailing and email address up-to-date.
• Diplomates are required to continuously satisfy their CME, SA, Patient Safety, and PIP requirements.
• Diplomates are responsible for choosing their own MOC activities. Physicians may choose the Continuing Medical Education, Self-Assessment and Improvement in Medical Practice plans that will best address their own needs, expand their expertise, and enhance the effectiveness and efficiency of their practice. Any Category 1 CME activities that are relevant to their practice will be acceptable. Self-Assessment and PIP activities must be chosen from the ABPN Approved Products List.
• Diplomates must successfully complete the MOC examination (or the MOC article mini-examinations if applicable) in all specialties and/or subspecialties in which they are certified in order to retain certification in that specialty/subspecialty (with the exception of Child and Adolescent Psychiatry).
• Diplomates currently in the 10-year MOC Program must attest to the completion of the required activities on their applications for the MOC examinations.
• Diplomates must keep a file of documentation related to completed MOC activities. In the event of an audit, ABPN may request documentation of completed MOC activities from the past 10-year period.

Responsibilities of the ABPN

• The ABPN will provide online services for the convenience of diplomates through ABPN Physician Folios. The Physician Folios includes mechanisms for tracking diplomates’ MOC requirements and activities, online applications for applying and paying for MOC examinations, and updating personal contact information in www.abpn.com/folios.
• The ABPN will provide regular reminders to diplomates regarding requirements, MOC examination reminders, updates to the MOC program, and other information of interest to diplomates. This information will be provided by email or via the website (www.abpn.com).
• The ABPN will make available a current examination schedule on our website (www.abpn.com). This examination schedule will include examination date choices and application deadlines. Applications are made through ABPN Physician Folios and are available three months before the initial deadline. Applications received after the initial deadline will incur a late fee.
• The ABPN will make available online Information for Applicants publications for each examination three months before the application deadline. These publications will provide detailed information about the requirements for admission and the administration of each examination and will remain available for reference until the subsequent publication. A blueprint describing the content of each examination will be available on the website.
• The ABPN will collaborate with professional organizations to ensure the availability of adequate numbers of SA and PIP MOC products.
• The ABPN staff will be available by phone and email during regular business hours to answer questions about requirements and examinations and offer ABPN Physician Folios and MOC support.
The ABPN Physician Folios is a single information source for physicians in all stages of his/her relationship with the ABPN - from resident through seasoned diplomate engaged in MOC. All ABPN Board Certified physicians have an ABPN Physician Folios account.

Your ABPN Physician Folios account is a customized and secure portal to:
- Manage and update personal contact information
- Keep medical licenses up-to-date
- Apply and pay for exams
- View and attest to your MOC requirements
- Pay your annual fee
- View score results

Please visit the ABPN website at www.abpn.com, click the ABPN Physician Folios button and follow the instructions to activate your account.

**How do I activate an account?**

In order to log in to the secure portal, you must have an established relationship with the ABPN through one of the following methods:
- You are a diplomate of the ABPN.
- Your training program has entered your residency and/or your fellowship training into the ABPN preCERT® system.
- You have previously applied for an ABPN examination.

1. Go to [www.abpn.com/folios](http://www.abpn.com/folios). You may wish to bookmark ("ctrl D") the login page for future quick reference.
2. Click on the 'Activate Account' box
3. A secondary authentication page will be launched asking for your current email address, first name, last name, birth date, and the last four digits of your social security number. (If the system is not able to authenticate you using these pieces of information, you can click on the Activate Account Assistance link for instructions.)
4. Upon authentication and activation, a unique case-sensitive password will be emailed to you.
5. Return to Physician Folios on www.abpn.com, enter your email address and your password and then click login.
6. Once you log in, you can change your password by clicking on the Change Password link at the top of the page.

See our [ABPN Physician Folios How to Flyer](#) for more information. For questions, please email questions@abpn.com.

**Finally**

The ABPN has made every effort to create an MOC program that will meet the requirements of our diplomates well into the future. The program is modified periodically to adjust to changes in the needs of our diplomates and to meet new requirements of the ABMS.

It is the desire of the ABPN to continue to provide services that will enhance our diplomates’ practice. To that end, the Board welcomes the comments and ideas of our diplomates, and encourages them to contact the ABPN office at questions@abpn.com with any questions or concerns.

For more information, please visit the Maintain Certification section at www.abpn.com.
